EQUIPMENT & TECHNOLOGY EXPO

New Door Installed at Farm Show

The Grand Park Sports Campus in Westfield has demonstrated their commitment to the Indiana Farm Equipment and Technology Expo by installing a new large entrance to allow farm equipment to be exhibited at the show. The 24 foot wide and 24 foot high door along with a new cement apron approach will allow for the easy movement of even the largest equipment into the show trade floor.

Show officials met recently with Grand Park personal to examine the new entrance. In addition a large concrete approach and spacious parking area will make set up and tear down quick easy for exhibitors. Movement of equipment into the show area will take place December 10 and 11 with small equipment and final set up to take place on December 13. Applications are currently being accepted for exhibit space.

**Exhibitors with questions should contact Toni Hodson at 800-876-5133
